Aims and Scope

NMC Case Report Journal (NMC CRJ) is a peer-reviewed, open access journal that publishes significant and novel case reports in all fields of clinical neurosurgery. *NMC CRJ* welcomes reports on rare cases on clinical works that provide medical importance and educational implications for diagnosis and treatment for researchers and clinicians of neurosurgery. Articles in *NMC CRJ* follow Continuous Article publication (CAP) model, where accepted articles are published on a continuous basis. *NMC CRJ* is an open access (OA) journal, which articles become accessible online immediately after publication without any subscription, membership, or access fees.

NMC CRJ is supported by the [Japan Neurosurgical Society \(JNS\)](#), which aims to advance the neurosurgical sciences worldwide. *NMC CRJ*, therefore, provides its authors with rapid but full peer-review services to select original, innovative, important work that is of the highest interest.

The journal requires that all manuscripts be prepared in accordance with the ["Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals."](#) as published by the International Committee of Medical Journal Editors ([ICMJE](#)).

Manuscript Types

The journal welcomes the following manuscript types, which are subject to peer review.

Case Reports

Case Reports present the details and observation of novelty and rare medical or clinical cases. Case Report will not be accepted unless they are significantly instructive/informative and interesting to the readership of *NMC CRJ*.

Letters to the Editor

Letters to the Editor are brief, constructive commentaries that can be submitted in response to a recently published article in *NMC CRJ*. Authors of the article will be invited to submit a reply letter.

Journal & Ethics Policies

NMC CRJ upholds the highest standards in scholarly publishing.

Before submitting a manuscript to the journal, authors must ensure that they have read and complied with the journal's policies. The journal reserves the right to reject without review, or retract, any manuscript that the Editor believes may not comply with these policies.

The responsibilities of the journal's authors, editors, reviewers and publisher regarding research and publication ethics are described in full below.

Submission to the journal implies that the manuscript has not been previously published (in part or in whole, in any language), is not in press, and is not under consideration for publication elsewhere. The journal's [Affidavit](#) following the instructions must be completed and signed by all authors and submitted with the manuscript.

Authors must inform the editors if any related manuscripts are under consideration, in press or published elsewhere. The availability of a manuscript on a publicly accessible preprint server does not constitute prior publication (see 'Preprints').

If authors choose to submit their manuscript elsewhere before a final decision has been made on its suitability for publication in *NMC CRJ*, they should first withdraw it from the journal.

Submission

NMC CRJ welcomes manuscript submissions from authors based anywhere in the world.

Submission of a manuscript to the journal implies that all authors: have approved it, warrant it is factual, have agreed to its submission, and have the right to publish it.

Originality

Submission to the journal implies that the manuscript is original work. Upon submission, the manuscript will be automatically checked for plagiarism by the Crossref's Similarity Check plagiarism software to determine both textual overlap and manuscript originality. By submitting a manuscript to the journal, authors agree to this screening. Any manuscript with an unacceptable level of unoriginal material may be rejected or retracted at the Editors' discretion.

Preprints

To support the wide dissemination of research, the journal encourages authors to post their research manuscripts on community-recognized preprint servers, either before or alongside submission to the journal. This policy applies only to the original version of a manuscript that describes primary research. Any version of a manuscript that has been revised in response to reviewers' comments, accepted for publication or published in the journal should not be posted on a preprint server. Instead, forward links to the published manuscript may be posted on the preprint server.

Authors should retain copyright in their work when posting to a preprint server.

Scooping

When assessing the novelty of a manuscript submitted to the journal, the editors will not be influenced by other manuscripts that are posted on community-recognized preprint servers after the date of submission to *NMC CRJ* (or after the date of posting on a preprint server, if the manuscript is submitted to the journal within 4 months).

Authorship

Submission to the journal implies that all authors have seen and approved the author list. Changes to the author list after manuscript submission – such as the insertion or removal of author names, or a rearrangement of author order – must be approved by all authors and the editor.

Authors are encouraged to consider [ICMJE Recommendations](#) on 'Defining the Role of Authors and Contributors'. The ICMJE recommends that authorship is based on four criteria: 1) making a substantial contribution to the conception or design of the work, or the acquisition, analysis or interpretation of data for the work; 2) drafting the manuscript or reviewing it critically for important intellectual content; 3) approving the final version of the manuscript for publication; and 4) agreeing to be held accountable for all aspects of the work and working to resolve any issues raised.

Any contributor who has met all four criteria should be an author on the manuscript. Contributors who do not meet all four criteria should not be authors of the manuscript but may be included in the Acknowledgements section instead.

Use of artificial intelligence (AI)-assisted tools/technologies

In consonance with the [COPE's position statement](#), [WAME's recommendations](#), and [ICMJE's Recommendation](#), *NMC CRJ* does not allow artificial intelligence (AI)-assisted tools/technologies such as Large Language Models (LLMs), chatbots, or image creators to be listed as author or co-author. As described in the ICMJE, those tools cannot be responsible for the accuracy, integrity, and originality of the work, thus they do not meet the [ICMJE's criteria for authorship](#) listed above.

Authors (humans) are fully responsible for any materials of the submitted work, including the use of AI-assisted tools or technologies. Authors should not list AI and AI-assisted technologies as an author or co-author, nor cite AI as an author. Authors (humans) are also responsible for plagiarism including the text and AI-produced images. Authors must disclose, upon submission and in the Materials and Methods (or similar section), any use of AI-assisted tools or technologies in the writing of a manuscript, production of images or graphical elements of the paper, or in the collection and analysis of data.

Image integrity

Authors may digitally manipulate or process images, but only if the adjustments are kept to a minimum, are applied to the entire image, meet community standards, and are clearly described in the manuscript. All images in a manuscript must accurately reflect the original data on which they are based. Authors must not move, remove, add or enhance individual parts of an image. The editors reserve the right to request original, unprocessed images from the authors. Failure to provide requested images may result in a manuscript being rejected or retracted.

Reproducing copyrighted material

If a manuscript includes material that is not under the authors' own copyright, the authors must obtain permission from the copyright holder(s) to reproduce it.

If a manuscript includes previously published material, the authors must obtain permission from the copyright owners and the publisher of the original work to reproduce it. The authors must cite the original work in their manuscript.

Copies of all reproduction permissions must be included with the manuscript when it is first submitted.

Availability of data and materials

Authors must disclose the source of publicly available data and materials, such as public repositories or commercial manufacturers, by including accession numbers or company details in their manuscript, as appropriate.

Animal/human experimentation

Authors of manuscripts describing experiments involving humans or materials derived from humans must demonstrate that the work was carried out in accordance with the principles embodied in the [Declaration of Helsinki](#), its revisions, and any guidelines approved by the authors' institutions.

If identification of patients is unavoidable in being able to affirm scientific validity, the authors must include a statement in the Materials and Methods section that describes the procedures for obtaining informed consent from participants regarding participation in the research and publication of the research. A PDF of the statement of approval of the study by the relevant institutional or regional review board should be uploaded to the submission system upon first submission.

Patient anonymity must be protected by avoiding details that might identify patients unless essential for scientific purposes. Details in the text, figures, photographs that might disclose

identity of subjects should be omitted to preserve subjects' anonymity. Measures such as masking of the eye region in photographs of patients may be inadequate.

Authors of manuscripts describing experiments involving animals or materials derived from animals must demonstrate that the work was carried out in accordance with the ethical guidelines approved by responsible committee of the authors' institution(s).

The Editors reserve the right to reject manuscripts that do not comply with the above provisions. Authors remain fully responsible for their statements.

Reporting guidelines

The journal requires authors to follow the [EQUATOR Network's Reporting Guidelines](#) for health research. Study types include, but are not limited to, case reports and diagnostic and prognostic studies. The journal encourages authors to follow [SAGER](#) guidelines and to include sex and gender considerations where relevant.

Author competing interests and conflicts of interest

In the interests of transparency, the journal requires all authors to declare any competing or conflicts of interest in relation to their submitted manuscript in the 'Disclosure of Conflict of Interest' section of the manuscript (see the relevant section below). A conflict of interest exists when there are actual, perceived or potential circumstances that could influence an author's ability to conduct or report research impartially. Potential conflicts include (but are not limited to) employment-consultancy relationships, stock ownership, honoraria, paid expert testimony, patent applications/ registrations, and grants or other funding. Further disclosure standards of financial conflicts of interest are available.

Authors should list all funding sources for their work in the Acknowledgements section of their manuscript.

Members of Japan Neurosurgical Society (JNS) must have supplied the COI declaration form for the last three years to the JNS Office before submitting a manuscript.

Confidentiality

The journal maintains the confidentiality of all unpublished manuscripts. By submitting their manuscript to the journal, the authors warrant that they will keep all correspondence about their manuscript (from the Editorial Office, editors and reviewers) strictly confidential.

Self-archiving policy

Self-archiving enables authors to deposit a copy of their manuscript in an online repository. *NMC CRJ* encourages authors of original research manuscripts to upload their article to an institutional or public repository immediately after publication in the journal.

Long-term digital archiving

J-STAGE preserves its full digital library, including *NMC CRJ*, with Portico in a dark archive (see <https://www.portico.org/publishers/jstage/>). In the event that the material becomes unavailable at J-STAGE, it will be released and made available by Portico.

Peer Review Process

Editorial and peer review process

The journal uses single-anonymized peer review. When a manuscript is submitted to the journal, it is assigned to the Editor-in-Chief, who performs initial screening. Manuscripts that do not fit the journal's scope or are not deemed suitable for publication are rejected without review. The remaining manuscripts are assigned to an Editor and two reviewers to assess each manuscript. The deadline for submission of the reviewers' reports are within 2 weeks.

Upon receipt of the two reviewers' reports, the Editor makes the first decision on the manuscript. If the decision is to request revision of the manuscript, authors have 3 months to resubmit their revised manuscript. Authors of revised manuscripts must submit a detailed point-by-point response to the reviewers' comments in the field of Response to Decision Letter on the submission system. The modified parts should be highlighted by under line or color font.

Revised manuscripts submitted after this deadline may be treated as new submissions. The Editor may send revised manuscripts to peer reviewers for their feedback or may use his or her own judgement to assess how closely the authors have followed the Editor's and the reviewers' comments on the original manuscript.

The Editor then makes a recommendation to the Editor-in-Chief on the manuscript's suitability for publication. The Editor-in-Chief is responsible for making the final decision on each manuscript.

The members of the [Editorial Committee](#) act in advisory roles, providing feedback as reviewers and making suggestions to improve the journal. In cases where the Editor-in-Chief is an author on a manuscript submitted to the journal, Co-Editor is responsible for making the final decision on the manuscript's suitability for publication in the journal.

The [Editorial Committee](#) considers the level of significance and interest to the journal's audience. Case reports judged to be of particular note will be accepted into NMC.

Reviewer timing and suggestions

Reviewers are invited within 2 weeks of an article being submitted. Reviewers are asked to submit their first review within 2 weeks of accepting the invitation to review. Reviewers who anticipate any delays should inform the Editorial Office as soon as possible.

When submitting a manuscript to the journal, authors may suggest reviewers that they would like included in or excluded from the peer review process. The Editor-in-Chief may consider these suggestions but is under no obligation to follow them. The selection and assignment of peer reviewers is at the Editor-in-Chief's sole discretion.

Reviewer reports

It is the journal's policy to transmit reviewers' comments to the authors in their original form. However, the journal reserves the right to edit reviewers' comments, without consulting the reviewers, if they contain offensive language, confidential information or recommendations for publication.

Acceptance criteria

If a manuscript satisfies the journal's requirements and represents a significant contribution to the published literature, the Editor may recommend acceptance for publication in the journal.

Articles in *NMC CRJ* must be:

- within the subject area of the journal's scope
- novel and original
- of high interest to the journal's audience
- important additions to the field.

If a manuscript does not meet the journal's requirements for acceptance or revision, the Editor may recommend rejection.

Editorial independence

As the journal owner, the Japan Neurosurgical Society (JNS) has granted the journal's [Editorial Committee](#) complete and sole responsibility for all editorial decisions. The JNS will not become involved in editorial decisions, except in cases of a fundamental breakdown of process.

Editorial decisions are based only on a manuscript's scientific merit and are kept completely separate from the journal's other interests. The authors' ability to pay any publication charges has no bearing on whether a manuscript is accepted for publication in the journal.

Appeals

Authors who believe that an editorial decision has been made in error may lodge an appeal with the Editorial Office. Appeals are only considered if the authors provide detailed evidence of a misunderstanding or mistake by a reviewer or editor. Appeals are considered carefully by the Editor-in-Chief, whose decision is final. The guidelines of the Committee on Publication Ethics ([COPE](#)) are followed where and when relevant.

Editor Confidentiality

The journal maintains the confidentiality of all unpublished manuscripts. Editors will not:

- 1) disclose a reviewer's identity unless the reviewer makes a reasonable request for such disclosure
- 2) discuss the manuscript or its contents with anyone not directly involved with the manuscript or its peer review
- 3) use any data or information from the manuscript in their own work or publications
- 4) use information obtained from the peer review process to provide an advantage to themselves or anyone else, or to disadvantage any individual or organization.

Conflicts of interest in peer review

A conflict of interest exists when there are actual, perceived or potential circumstances that could influence an editor's or reviewer's ability to act impartially when assessing a manuscript. Such circumstances might include having a personal or professional relationship with an author, working on the same topic or in direct competition with an author, having a financial stake in the work or its publication, or having seen previous versions of the manuscript.

Members of the journal's [Editorial Committee](#) undertake to declare any conflicts of interest when handling manuscripts, but it is not always possible to identify potential bias. An editor or reviewer who declares a conflict of interest is unassigned from the manuscript in question and is replaced by a new editor or a reviewer.

Manuscripts submitted by editors, editorial committee members, or journal staff will follow the same process as outlined above and should include a statement that declares their personal conflict of interest with the journal.

Errata and retractions

The journal recognizes the importance of maintaining the integrity of published literature.

A published article that contains an error may be corrected through the publication of an Erratum. Errata describe errors that significantly affect the scientific integrity of a publication, the reputation of the authors, or the journal itself. Authors who wish to correct a published article should contact the Editorial Office with full details of the error(s) and their requested changes. In cases where co-authors disagree over a correction, the Editor-in-Chief may consult the [Editorial Committee](#) or external peer reviewers for advice. If a Correction is published, any dissenting authors will be noted in the text.

A published article that contains invalid or unreliable results or conclusions, has been published elsewhere, or has infringed codes of conduct (covering research or publication ethics) may be retracted. Individuals who believe that a published article should be retracted are encouraged to contact the Editorial Office with full details of their concerns. The Editor-in-Chief will investigate further and contact the authors of the published article for their response. In cases where co-authors disagree over a retraction, the Editor-in-Chief may consult the [Editorial Committee](#) or external peer reviewers for advice. If a Retraction is published, any dissenting authors will be noted in the text.

The decision to publish Errata or Retractions is made at the sole discretion of the Editor-in-Chief.

Editors and reviewers as authors in the journal

Any member of the journal's [Editorial Committee](#), including the Editor-in-Chief who is an author on a submitted manuscript is excluded from the peer review process. Within the journal's online manuscript submission and tracking system, they will be able to see their manuscript as an author but not as an editor or a reviewer, thereby maintaining the confidentiality of peer review.

A manuscript authored by an editor or a reviewer of *NMC CRJ* is subject to the same high standards of peer review and editorial decision making as any manuscript considered by the journal.

Responding to potential ethical breaches

The journal will respond to allegations of ethical breaches by following its own policies and, where possible, the guidelines of [COPE](#).

Reviewer confidentiality

As part of their responsibilities, reviewers agree to maintain the confidentiality of unpublished manuscripts at all times. By accepting the invitation to review a manuscript, reviewers agree not to:

- 1) disclose their role in reviewing the manuscript
- 2) reveal their identity to any of the authors of the manuscript
- 3) discuss the manuscript or its contents with anyone not directly involved in the review process
- 4) involve anyone else in the review (for example, a postdoc or PhD student) without first requesting permission from the Editor
- 5) use any data or information from the manuscript in their own work or publications
- 6) use information obtained from the peer review process to provide an advantage to themselves or anyone else, or to disadvantage any individual or organization.

Copyright, Open Access and Fees

NMC CRJ is fully Open Access and uses Creative Commons (CC) licenses that, in line with the license, allow users to use, reuse and build upon the material published in the journal without charge or the need to ask prior permission from the publisher or author. More details on the CC license used are below.

Copyright and licensing

Authors are required to assign all copyrights in the work to the Japan Neurosurgical Society, who then publish the work under the [Creative Commons CC BY-NC-ND 4.0](#) (AttributionNonCommercial-NoDerivatives 4.0 International) license. This license allows users to share unmodified articles, noncommercially, as long as appropriate credit is given.

Some funding bodies require articles funded by them to be published under a specific Creative Commons license. Before submitting your work to the journal, check with the relevant funding bodies to ensure that you comply with any mandates.

Publication fees and charges

Article Processing Charges

For the articles published in *NMC CRJ*, there is no article processing charges (APCs).

Color Charges

Color figures are published online free of charge to authors in *NMC CRJ*.

Manuscript Submission

All manuscripts must be submitted via the journal's online submission system, ScholarOne: <https://mc.manuscriptcentral.com/nmc>, which is used for both *NMC CRJ* and *NMC*. Please go directly to the site and upload all your manuscript files under the manuscript type of "Case Reports".

The manuscript text must be submitted as a Microsoft Word file, and include the title page, Abstract, text, COI disclosure, References, and figure legends. Figures and tables must NOT be embedded within the manuscript file.

If included in the submission, each set of materials listed below must be cited appropriately in the manuscript text. A title for each Table, Figure or Video must be included. Total file size is limited to ≤ 20 MB including figures, tables and supplementary materials.

- 1) Text (Title page, Abstract - Legends): MS Word
- 2) Tables: MS Word, MS Excel (saving as an image is not a valid format)
- 3) Figures: JPEG, PNG, GIF
- 4) Video: AVI, MP4, MPEG

If you encounter any problems with online submission, please contact the Editorial Office as per the details in the Contact section.

Manuscript Preparation

Style

The manuscripts should be typed double-spaced throughout with ≥ 12 -point type face, formatted for A4 paper leaving margins of at least 2.5 cm (1 inch). Number all pages consecutively.

English standards

Manuscripts, including figures, tables, supplementary files and video materials, should be prepared in English. Authors whose native language is not English are strongly encouraged to have their manuscript checked by a native English speaker or by an editing service prior to submission. If a manuscript is not clear due to poor English, it may be rejected without undergoing peer review.

Article structure and lengths

The organization of the manuscript should be in the following order.

- Title page: Article title, authors' full names, affiliations, running title, and the name and full address of the corresponding author.
- Abstract and keywords
- Main text

- Acknowledgment (if any)
- Conflicts of Interest
- References
- Legends
- Tables and Figures
- Supplementary Files (e.g. videos, if available)

Manuscripts should conform to the length specified in the below table. The word limit or the printed pages includes References and tables and figures. One printed page is approximately 800 words. One table or figure is the equivalent of approximately 400 words.

Article type	Abstract	Main text			Tables/ Figures
	Word limit	Word limit	Printed pages	Headings	
Case Reports	250 words; unstructured	4,000 words	5 pages	Introduction, Case Report, Discussion	4
Letters to the Editor	-	800 words	1 page	-	-

Title Page

The title page should comprise the following.

- 1) A concise but informative title. Only the first letter of each word should be capitalized, except for conjunctions, articles, or prepositions unless the first word of the title. Chemical formulas or abbreviations should not be used, but long common terms such as names of compounds or enzymes can be abbreviated.
- 2) Authors' full names without academic qualifications or nomenclature
- 3) Full names of the department(s) and institution(s) in which the research was undertaken, together with the location (city, state, and nation). Use superscript numbers to indicate authors from different institutions.
- 4) Up to 5 informative keywords (or short phrases), based on the Index Medicus or similar.
- 5) A brief running head (running title), not to exceed 60 characters (count letters and spaces). Abbreviations defined in the text can be used.
- 6) Corresponding author's name, academic title (e.g.M.D), full address, telephone and e-mail address. Only one corresponding author is permitted.

Footnotes

Footnotes, if any, should be included in the title page.

Abbreviations

Avoid nonstandard abbreviations, unfamiliar terms or symbols, and laboratory jargon. Each abbreviation should be defined in parentheses together with its non-abbreviated term when it first appears in the text (except in the Title and Abstract).

Numerals and Units

Use Arabic numerals. Standard metric units (mm, cm, ml, l, mg, g, msec, sec, min, hr, etc.) can be used throughout without definition.

SI or SI-derived units should be used. More information on SI units is available at the Bureau International des Poids et Mesures (BIPM) website.

Abstract

The Abstract should clearly express the basic content of the paper in a single paragraph without subheadings. Provide enough information for the Abstract to be easily understood without reference to the text, and emphasize new and important aspects of the study.

Abstracts should not exceed 250 words. Avoid using specific abbreviations. If it is essential to refer to a previous publication, omit the article title (e.g. Maekawa, S., Endo, S., and Sakai, H. (2015). *Sci. Journal.*, 14: 10–15).

Mein text

Case Report should be brief and not exceed 4,000 words. The text of the article is usually, but not necessarily, divided into sections with the headings Introduction, Case Reports and Discussion.

Acknowledgments

This section should be brief. State personal or institutional contributions, and financial or material support. Supply full information for nature of support (technical help, critical review, data collection, and participation in clinical trial), number of grants-in-aid, and name and location of institution or organization.

Disclosure of Conflict of Interest

All authors must state any actual or potential conflicts of interest with regard to the manuscript submitted for review under a heading of "Conflicts of Interest Disclosure" following the "Acknowledgment" section. Authors should also state if there are no conflicts of interest. In addition, authors who are members of the JNS must register online self-reported COI Disclosure Statement Forms through the website for JNS members or not.

Example: A (author name) received a research grant from X (entity name).; B serves as a consultant to Y.; C received lecture fees from Z.; All authors have no conflict of interest.

References

The journal uses a modified Vancouver style; number references consecutively in the order cited in the text, not alphabetically, and use superscript numbers followed by a closing parenthesis (e.g. 1–3)). When there are six or fewer authors, all should be listed; when there are seven or more, include only the first three and add "et al.". If no person or organization can be identified as the author and no editors or translators are given, begin the reference with the title of the article. Do not use 'Anonymous'.

Articles accepted but not yet published can be included in the reference list, but manuscripts in preparation, unpublished observations, and personal communication should be noted in parentheses in the text. Including AI-generated material as the primary source in the reference is not allowed.

The journal name should be abbreviated as in Index Medicus, but full name be provided if it is not registered in the Index Medicus.

Examples

- 1) Albright AL, Barry MJ, Painter MJ, Shultz B: Infusion of intrathecal baclofen for generalized dystonia in cerebral palsy. *J Neurosurg* 88: 73–76, 1998

- 2) Donegan J: Anesthesia for pediatric neurosurgery, in Cottrell J, Turndorf H (eds): Anesthesia and Neurosurgery. St Louis, CV Mosby, 1986, pp 173–187
- 3) Russell DS, Rubinstein LJ: Pathology of Tumours of the Nervous System, ed 5. London, Edward Arnold, 1989
- 4) Tanaka T, Yonemasu Y, Olivier A, Andermann F: [Clinical analysis of reoperation in cases of complex partial seizure]. No Shinkei Geka 17: 933– 937, 1989 (Japanese)
- 5) Kinoshita M, Miyashita K, Tsutsui T, Furuta T, Nakada M: Critical neural networks in awake surgery for gliomas. Neurol Med Chir doi.org/10.2176/ nmc.ra.2016-0069 Epub 2016 Jun 2.
- 6) Report of brain tumor registry of Japan (20012004) 13th Edition.
https://www.jstage.jst.go.jp/article/nmc/54/Supplement/54_sup.2014-0000/_article
 (Accessed Sep 9 2016)

Tables

Cite all tables in the text, and number consecutively according to appearance in the text. Provide each table on a separate page, supplying a brief title and explanatory footnotes. All abbreviations used in each table should be explained in the footnotes. Each column must carry an appropriate heading, and units in numerical measurements should be added to the column heading in parentheses.

If data can be described in one or two sentences in the text, do not present them in a table. Tables must be submitted as either Microsoft Word or Excel files, NOT converted into images.

Figures

Cite all figures in the text, and number consecutively in the order cited in the text. Titles and detailed explanations should be given in the legends, not on the figures. All abbreviations used in each figure should be explained in each legend. Related illustrations should be grouped into one figure on one page.

Figure legends should provide a brief, self-sufficient explanation of the illustrations and typed together in the “Figure Legends” section of the manuscript. Describe the staining method and original magnification for photomicrographs, and bar measurements for electron micrographs.

Figures can be in color in the print version at the costs as detailed in the ‘Publication fees and charges’ section.

Supplementary material

Supplementary material adds, but is not essential, to a reader’s understanding of a manuscript. Authors are encouraged to submit supplementary material for online-only publication.

Supplementary material may comprise data, text, audio or movie files, and is published online alongside the accepted manuscript.

Videos can be submitted as “Supplementary Material” to support your research information in the submitted manuscript. Acceptable video file formats are MPEG (.mpg), Quicktime (.mov), or Microsoft (.avi). Maximum file size/video is 20 MB. A credit line that represents the copyright holder is the Japan Neurosurgical Society will be added in the video materials when they are published.

As supplementary material is peer-reviewed, authors must submit it in its final form as part of their manuscript submission. After a manuscript has been accepted for publication, authors may not make any changes to the supplementary material. All supplementary materials will be published alongside the article on the journal website. The same policies for ethics, copyright, permissions and publication quality for the main article apply to the supplementary materials.

Accepted Manuscripts

Manuscripts that are accepted for publication are copyedited and typeset by the journal's production team before publication. The journal is published freely available online on a continuous basis. All communication regarding accepted manuscripts is with the corresponding author.

Proofs

Page proofs are sent to the corresponding author, who should check and return them within 48 hours. Only essential corrections to typesetting errors or omissions are accepted; excessive changes are not permitted at the proofing stage.

Reprints

Order forms for reprints are sent with the proofs to the corresponding author and should be returned with the proofs.

Contact
